Careline Newsletter

January 2020

Happy New Year to you all and welcome to our January Newsletter,

It's been a busy festive and New Year period for us and all of our staff here at Careline! All of us here in the Careline office wanted to pass on our thanks and gratitude to all of our support workers and nursery staff for their hard work over what was an extremely busy festive period. With new clients coming on board all the time things aren't slowing down either in January! Needless to say this wouldn't be possible without our staff who continue to provide a superior service wherever they go - your hard work, dedication, reliability and professionalism make us the well-respected and 'go-to' care provider in the Home Counties.

Calling all Waking Night Staff!!

We have a wide variety of work within elderly services and supporting people who have learning and/or physical disabilities.

Many of our services provide overnight support along with many of our client's requiring night support.

The role of the waking night staff is to remain awake all night and tend to the needs of the client as well as completing light chores if required.

WE WANT YOU!

This is different to a sleep-in duty where you would go to sleep and be on-call should the client need you. Waking Night shifts usually start around 9pm until around 7am and are usually paid at an enhanced rate.

If you think you have got what it takes please contact us!

Please give the office a call on 0118 9585858 for more information

"...I would just like to say how fantastic Steven is! He has been incredibly helpful and the children have warmed to him well. He has been really calm when talking to them and he has mucked in with every activity and has given it his all. We would definitely have him back if we need any future cover"

Feedback received from a Nursery Manager regarding a member of the Careline team.

Careline Supports SENS Research Foundation

SENS Research Foundation works to develop, promote, and ensure widespread access to therapies that cure and prevent the diseases and disabilities of aging by comprehensively repairing the damage that builds up in our bodies over time. SENS is redefining the way the world researches and treats age-related ill health, while inspiring the next generation of biomedical scientists.

"...Oiyee is excellent, very enthusiastic and brings in lots of activities for D to do. D loves her and is a very different person when supported by her"

Feedback received from a relative of a 1:1 Service User

Young Carers Awareness Day 30th January 2020

Young Carers Awareness Day raises awareness of the challenges faced by young carers and campaigns for greater support for them.

Every day across the UK thousands of young people help to look after someone in their family, or a friend, who is ill, disabled or misuses drugs or alcohol.

Recent research shows that one in five secondary school children may be a young carer. For many, their caring journey begins at a much younger age. Caring for someone can be very isolating, worrying and stressful. For young carers, this can negatively impact on their experiences and outcomes in education, having a lasting effect on their life chances.
